

*Offering design, style and quality from a handcrafted factory with advanced technology.*

# SERIE STUDIO

If you are thinking of renovating the tiles in your bathroom or kitchen, we recommend that you analyze in detail the extensive catalog that our Factory has, for sure that you will find different models that will fit, because of their quality and design, what you are looking for. Today we want to introduce you to the Studio Series, capable of giving a new dimension to your homes.

The Studio Series has a surface with soft undulation that gives it a unique beauty. This Collection has a wonderful range of colors that will provide depth and a unique character to each piece.

The Studio Series design suite includes beautifully embossed decorative pieces as well as hand-painted decorations. Craftsmanship and new technologies merge in the creation of this collection.

# MORE ABOUT THE STUDIO COLLECTION

Without question, this collection allows us to give a classic and timeless character to the room in which we decide to install it, also giving a unique distinctive character to each project. If we briefly review each color available in the collection, we can see how this collection offers a select range of complementary pieces, finishing and decoration pieces: we have strictly classic reliefs, such as the Vizcaya Relief, Palm Beach or Gables, as well as others more daring like the Planet and Universe Mandalas.

There is also a rich range of complementary pieces available that allow the installations to be perfectly finished with a distinctive classic style. Additionally, in the case of mouldings or the skirting board, they have angles for the perfect finish of the corners. These are elements that nowadays very few factories in the tile sector in Europe can offer in a range like the one of our Factory.

Regarding the colors, the collection is available in ten colors: Snow Cap, Bamboo, Silver

Sands, Volcanic, Graystone, Timberline, Eucalyptus, Almond, Ice Blue and Fern, which make up a wide-spectrum palette. From the warmest and most sober ones, to cold colors that are trending in the contemporary interior designs.

All of them have the same varied range of complementary parts that we mentioned before, which makes ADEX the only manufacturer that gives such exceptional variety of options to its catalog. Each color becomes a complete collection by itself that will not leave the most demanding interior designers and decorators indifferent.

And on the other hand, each color is available in different formats, in the collection there are available: square formats such as 14.8x14.8 and rectangular 9.8x19.8, 7.3x14.8 and 4.9x19.8, with a frame finish available in 7.3x14.8 case with an outstanding design. And also for lovers of Victorian classicism, a unique octagonal wall format (in the colors Snow Cap and Bamboo) that, combined with the stylized designs of the matching 3x3 dots, will give any room a distinctive style.

And finally, a special mention goes to the hand-painted decorations in this collection that will delight lovers of vintage style in interior design. We will remember the best tradition of traditional ceramics with the: Dusk Flores Border, Dawn Flores Border, Dawn Flores Decor and Dusk Flores Decor. Fine petals painted using stencil technique where each piece is unique thanks to the brush strokes of our painters.

The ADEX Studio Series maintains the company's philosophy, implemented since 1897, which is none other than to offer a final result that combines design, style and quality from an artisanal factory, but without neglecting the coherent and efficient application of new technologies.

Currently, the fourth and fifth generations are at the head of the company, which every day provides maximum professionalism and exhaustive care to achieve excellent results on the products. A seal of quality and distinction that has characterized ADEX for more than 125 years.
